

Please do not add to an already stressed out flying public! I am a flight attendant who sees this move as opening a free for all in the skies. I have been involved in more than one incident where cell phone misuse has almost come to a brawl among passengers. It is an invitation to terrorists who would be able to talk to one another while planning to takeover an aircraft, and where there is space on the ground to get away from annoying cell phone users, it is impossible not to hear shouting and yes, screaming into cell phones in order to be heard over the engine noise. On all counts this is a very bad idea...keep the aircraft noise to a minimum...air rage is bad enough! Thank You for reading this.
